

FSNN Discussion

December 15, 2022

Big thank you to the local organizing committee!

- Sarah Van Heusen
- John Wilkerson
- Robert Janssens
- Vincente Guiseppe
- Mohammad Ahmed
- Calvin Howell
- Paul Huffman

Big thank you to the Friday Center!

This town hall has gone extremely smoothly from AV to breaks and lunch. We thank all the staff of the Friday Center staff that made this possible.

Big thank you to the FSNN Community!

We received much constructive feedback and our recommendations are now much stronger.

What are we working towards?

- The conveners need to submit a whitepaper summarizing the FSNN community by February 28th.
- A draft will be submitted to the community for comment by the end of January - This is not your last opportunity to comment!
- The recommendations and their descriptive text are essentially the executive summary (we have added a lot of supporting text).
- The narrative structure will roughly follow the science driven agenda with sections on facilities, other unique needs of the community, and our workforce and DEIB requests.
- We will pull text from the submitted whitepapers and will request help from the community via this week's speakers for specific sections.

Status

We attempted to incorporate all of the feedback from yesterday's session and additional comments that came in last night as we worked. We are tuning the recommendations both for the LRP writing committee and to explain the needs of the community in other contexts.

This morning we will:

- Review the Endorsements.
- Review the Recommendations (Reverse Order from Last Night).
- Break at 10AM
- Poll the Community.
- Final discussion - *Focus on building FSNN community in between LRPs.*
