

JUNE 22ND - 26TH

2026 EXOTIC BEAM SUMMER SCHOOL

Oak Ridge National Lab, Oak Ridge, TN

The Exotic Beam Summer School 2026 (EBSS2026) will introduce students and young researchers to the science of exotic nuclei covering nuclear structure, astrophysics, fundamental interactions, and applications of nuclear technology. It will help prepare participants to leverage ideas, techniques, and detectors used at advanced facilities such as the Facility for Rare Isotope Beams (FRIB) and Argonne National Laboratory (ANL). Mornings will feature lectures by leading experts on theoretical, experimental, and applied topics, while afternoons will offer hands-on training in techniques and instrumentation for experiments with exotic beams.

2026 EBSS Board of Directors

Charles Rasco (ORNL), Local Chair
Ryan Ringle (FRIB/MSU)
Erich Leistenschneider (LBNL)
Wei Jia Ong (LLNL)
Jason Clark (ANL)
Jonas Karthein (TAMU)
